

HYDOREX LP series pleated filter cartridge is "depth" type filter cartridge. It made of cellulose free PP membrane, with netting to hold pleats in place, and come with inner PP core for greater filtration pressure. LP series produced with no binders or additives to leave a residue, foam or contaminate. Filter media is pleated for greater filtration area. It perform higher flow rate, low pressure drop and good filtration efficiency.

## SPECIFICATIONS

Material : Inner core - PP  
 Media - cellulose free PP membrane  
 Outer netting - nylon  
 Inner Diameter : 28 mm  
 Outer Diameter available : 63, 114, 150, 180 mm or other custom made outer diameter  
 Micron size available : 1, 5, 10, 20, 30, 50  
 Length available : 10", 20", 30", 40" or other custom made length  
 Max. temperature : 50°C

## BENEFITS

- No additives or binders which may cause foaming
- Low pressure drop, long life
- High dirt holding capacity
- More filtration surface, longer life
- High filtration efficiency with membrane media
- Superior performance

## ORDERING INFORMATION

LP	-	05	-	10	-	A	-	E
Series		Micron Rating		Length		Connections		Gasket
PP	:	01 = 1 µm	30 = 30 µm	(Nominal L.)		A = 222 FLAT	D = 226 / 2 FIN	S = SILICON
		05 = 5 µm	40 = 40 µm	10 = 10"		B = 222 FIN	E = SOE	
		10 = 10 µm	50 = 50 µm	20 = 20"		C = 226/2 FLAT	F = DOE	
		20 = 20 µm		30 = 30"				
				40 = 40"				

Note : Above are our standard models.  
 For special requirement, please specified the diameter and length .
